

COVID-19 WORKPLACE SAFETY SOLUTIONS

PRE-SHIFT HEALTH ASSESSMENTS

Verve Health is your partner in keeping your employees stay safe at work. If you are an essential business or in the process of moving back to the workplace, our pre-shift health assessments can help ensure the safety of your employees by screening for past and current COVID-19 symptoms to determine appropriate timing for a safe return to work.

1

SYMPTOM QUESTIONNAIRE

Employees will fill out a pre-shift symptom questionnaire to provide primary determination of health status.

2

ONSITE TEMPERATURE CHECKS

Once onsite, our staff will provide a secondary symptom questionnaire and touch-free temperature check.

3

SAFETY ASSESSMENT

Our clinical team will determine if each employee is eligible to work the shift or an alternate time frame for return.

Implement this at your worksite(s) for \$100 start-up fee + \$30/screener/hour (4-hour minimum duration). May be subject to additional travel costs depending on location.

For more information, please contact our Screening Manager at
MELMORE@VERVE-HEALTH.COM
with the number of sites, location of each site, number of employees, and desired shift coverage.
