

Hot Topic Workshop: ARTIFICIAL INTELLIGENCE (AI)

Friday, November 7
10:00 a.m. - 2:30 p.m. Eastern

Artificial intelligence is rapidly moving up the ladder as a solution to the evergreen call for more efficiency in government operations. From streamlining service requests to supporting budget forecasting and communications, the possibilities are significant - but so are the risks if integration happens too quickly or without guardrails. Join this foundation-setting workshop, intended to offer informed and cautious ways to implement AI in municipal government.

AGENDA

10:00 a.m. – 10:15 a.m.	Welcome and Introduction to the Day We'll start the workshop by welcoming attendees, reviewing what to expect from the day, and offering timely Aim updates.
10:15 a.m. – 11:45 a.m.	Putting the Emphasis on <i>Intelligence</i>: It's OK to be Careful and Strategic about AI Integration Before jumping into the deep end, municipal leaders need to approach this new intersection of local services and technology with both vision and caution. This session will provide a clear overview of the opportunities and challenges of AI adoption in cities and towns, with a strong emphasis on what leaders must consider in advance. Topics will include public records and transparency, data ownership and security, employee use and HR considerations, risk management and cyber security. By the end of the session, participants will understand why AI integration requires thoughtful planning, legal and policy awareness, and strong internal communication.
12:15 p.m. – 2:15 p.m.	AI Demonstrations Throughout several live demonstrations, a host of Indiana elected and appointed municipal officials will review their road to AI deployment, including what platforms they use, and whether the intended outcomes were realized through the use of the community's chosen AI tool(s).
2:15 p.m. – 2:30 p.m.	Closing Remarks and Adjourn
